Passionate and creative **Software Engineer**. I am highly professional with an aptitude for problem solving and a need to create.

I have experience in **Full Stack Web Development** with comprehensive expertise across the entire stack. Proficient in **both front-end and back-end** development, with a strong understanding of **infrastructure** and **deployment** processes.

## TECH STACK

## WORK EXPERIENCE

### Software Engineer II

Green Man Gaming  
London, U.K  
November 2021 - current

Currently serving as a Software Engineer II at Green Man Gaming, I have accumulated valuable experience and expertise in various areas of software development during my ongoing three-year tenure. On the **front-end** side, I have effectively utilized technologies such as **React, Typescript, Tailwind** and **Storybook**. On the **back-end** side, **Golang, Python, C# / .NET, MongoDB, PostgreSQL, CouchDB**

Furthermore, I have actively engaged in **infrastructure** management on **AWS** and **GCP**, employing tools like **Pulumi** to implement Infrastructure as Code (IaC) principles. During this time I successfully obtained the **AWS Associate Developer certification (DVA-C02)**.

I am also experienced in using and managing **CI/CD pipelines**, Github Actions and during the on-call shift, I am in charge of **production deploys**.

In addition to my technical contributions, I have regularly participated in various activities such as **technical investigations, code reviews**, and **sprint demos**. I also take part in the **on-call** schedule for incident response and mitigation.
